

SOUND ASSOCIATES, INC.

GALAPRO MOBILE APP

Captions, Audio Description and Text Translations
via your WiFi Enabled Smartphone or Tablet

GalaPro is a unique service that utilizes a mobile app to deliver captions, audio description, even text translations on demand to theater patrons using the GalaPro app on their own smartphone or WiFi enabled tablet.

Using the GalaPro server and the CS-6 show control base station to automate the services, Sound Associates offers venues the ability to supply automated captions, audio description and translation to live theatrical productions. Touring venues have access to a wide array of productions originating on Broadway and London's West End. Regional Theaters have found this service invaluable in reaching out to their community; making their productions more accessible and inclusive.

Since February 2022, when the Shubert Organization acquired GalaPro, Sound Associates has managed operations for equipment sales, installation services, content development and key technical support to theaters across the globe, making live productions more accessible than ever before.

Features:

- Offer captions, audio description and / or text translations to your audience at every performance.
- Compatible with most WiFi enabled smartphones and tablets.
- Patrons may use their own device with no cost to download app.
- No fee to patrons for accessibility services (translations can be offered as an in-app purchase).
- Automate content with midi show control or OSC interface (sold separately).
- Manually cue service with GalaPro's Manual Pusher Software
- Provide captions or text translations for unscripted performances by connecting to a CART operator.

SOUND ASSOCIATES, INC.

Technical Specification:

(All Options, 2-8 RU total)

<u>Product</u>	<u>Purpose</u>	<u>Dimensions</u>
GalaPro Computer	GalaPro Content, delivery	211 mm x 116 mm x 28 mm
Behringer UMC1820	Audio Interface Voice Recognition	127mm x 119mmx 50.8mm
UPS Power Back Up	15amp Minimum -if house provided	Typically, 2-4 RU

Optional, but recommended if not provided by house.

The GalaPro computer requires internet access, and a static IP address provided by a DHCP server.

A dedicated SSID must be provided for GalaPro. Wireless clients connected to this SSID will need the ability to access the GalaPro computer, but must be blocked from internet access.

In addition to the GalaPro SSID, patrons will need access to the internet via a second SSID to allow for the initial installation and setup of app.

The DHCP Server must supply to the GalaPro computer

- Static IP address
- Subnet mask
- Default gateway address
- DNS server address

Warranty

The R4 Receiver is covered by a full three-year warranty, from the original date of purchase, against defects in workmanship or materials. If either component fails due to defects in craftsmanship or materials, we will repair or replace the component without charge. The factory warranty does not cover malfunctions due to abuse or operation other than specified.
